# 2015 SUGGESTED ENHANCEMENTS

The primary purpose of the Annual User Group Meeting is to get your input on what should be changed in our software modules to make them work harder for you!

What you need to do is send us your suggested enhancements.  There's no real "format" for doing this, but there are some suggestions below.  We prefer that you fill out this form and press the yellow Submit by Email button to send it to us electronically or you may type up a Word doc and e-mail that.

Remember, we need to have your List of Suggested Enhancements no later than April 30th, 2014.  This is to ensure that your ideas are incorporated before the "book" goes to the printers so they can be discussed at the meeting.

Here is a format you might consider...

**Ticket Express Suggested Enhancements From ABC Resort:**

**1.  New Product Report**

We would like a Product Report that shows ALL the Calendar Pricing for a Product or range or Products SIMULTANEOUSLY.  It should be filtered based on Starting/Ending S/R Position.  We would use this to make auditing of entered Calendar Pricing easier.

**2.  Bulk Selling - Putting In A Past Date As Start Date**

In Bulk, the system should not allow tickets to be printed with a past date, or at least give them a message "this is a past date, do you want to continue?".  We had several cases where the wrong year was entered this season (very embarrassing when the tickets don't "scan"!)

**3.  ETC.**

**Pass Express Suggested Enhancements From ABC Resort:**

**1.  Image Availability**

We would like to have a process whereby we can "grab" the Guest Image and use it in other programs like Word For Windows. This would help us with our Pass Renewal From production where we allow the Guest to check a box if they want to use last year's picture on this Year's pass.

**2.  ETC.**
